

## Abg Stabilizer

Proteins (Ab/Ag) in solution are more susceptible to temperature fluctuations and contamination with oxidative and microbial agents. As a general rule, proteins in solution are more stable when stored in high concentrations at low temperatures. Padtan Elm has developed Abg stabilizer to maintain the activity of diluted antigens and antibodies for long term storage. This solution provides stability to diluted proteins, preserving the native conformation and preventing the loss of functionality due to long storage

<b>Size</b>	<b>10, 50 ml</b>
<b>pH</b>	<b>7.4</b>
<b>Dilution</b>	<b>Ready to use</b>
<b>Storage</b>	<b>4-8 °C</b>
<b>Shelf life</b>	<b>12 months</b>
